ABOUT THE CONFERENCE

Aiming at bringing together innovative academicians and industrial experts in the field of Green Energy, Environment and Sustainable Development to a common forum, we are looking to provide an academic platform on the communication of latest research and developmental activities in related areas and promote information interchange between researchers, developers, engineers, students, and practitioners working all around the world.

Since the landmark 1972 Stockholm Conference on the Human Environment, the issue of the environment has been placed within the framework of sustainable development. All of the UN's Sustainable Development Goals (SDGs) have some connection to the environment. The SDGs with a direct connection are Goal 6 (Clean Water and Sanitation), Goal 7 (Affordable and Clean Energy), Goal 11 (Sustainable Cities and Communities), Goal 12 (Responsible Consumption and Production), Goal 13 (Climate Action), Goal 14 (Life below Water), and Goal 15, (Life on Land).

During the conference, there will be substantial time for presentations and discussions. In addition, poster sessions and exhibitions offer valuable opportunity for exchanging information among delegates and participants, especially for those who are looking for new opportunities between presenters and participants.
