

About the Seminar

Assisted Reproductive Technology is developed as an advanced medical science miracle to assist conception and pregnancy. It is used as a guarantee for the cure of infertility everywhere. These techniques are designed to assist both medical and social infertility. It is used indisputably in assisting human reproduction for all simple processes (like IUI) to complex processes (like IVF, ICSI etc.) It has gained fast growth in India in comparison to other countries of the world. Indian Government policies promote medical tourism in India. In response a well versed infertility industry got established in India providing best and cheap services for ART and Surrogacy arrangements. Infertility among Indian couples is rising due to various reasons at one end and at other end doors for foreign nationals are open to facilitate the ARTs and in surrogacy arrangements in India (up to 2012). In fact, India has developed as one of the best destination for the ART services. Internationally, The Global Assisted Reproductive Market size is expected to grow from 26.28 billion in 2021 to \$31.29 billion in 2022 at a compound annual growth rate of 19.1% (ETHealthWorld.com 16 Jan 2022). Indian IVF is growing at a CAGR of 28%, and is expected to be around INR 495 crore by 2022. The worst part is that, such a large industry was running without legal regulations for more than two decades in India. It was merely regulated by the guidelines issued by the Indian Council of Medical Research (National Guidelines for Accreditation, Supervision and Regulation of ART Clinics 2008). Recently, Assisted Reproductive Technology (Regulation) Act 2021 and Surrogacy (Regulation) Act was passed in Dec 2021.

With all its merits the use of Assisted Reproductive Technology is always subject to a public debate for its ethical and legal issues. ART industry is working on the experimental basis without certainty of success or even in some case without probability of success. Therefore it is required to explore, discuss, research, asked, suggest, reform, analyse, criticise the area of application, relevance, scope and limitations of ART.

Important Dates

Last Date of Abstract Submission

10 December 2022

Last Date of Full Paper Submission

30 December 2022

Date of Seminar

7 January 2023

About the University

The idea of starting a University at Lucknow was first mooted by Raja Sir Mohammad Ali Mohammad Khan, Khan Bahadur, K.C.I.E. of Mahmudabad, who contributed an article to the columns of "The Pioneer" urging the foundation of a University at Lucknow. Lucknow University was established in the year 1920. Vision of the University is to develop human resource for furtherance of knowledge through teaching, research and innovation and to rank amongst the top educational institutions of the world for better service to humanity in general and our nation in particular. University's mission is to be a university driven by values enriched with diverse cultures and promote economic, social and spiritual advancement for an egalitarian society.

About the University and Faculty of Law
